

The Sharpening Shack Offers "Wicked Edge" Knife Sharpening Service

Custom High Quality Knife Sharpening Service Done By Hand - "Your Edge Angles Are Sharpened Exactly To Recommended Knife Angle Specifications or Based Upon Your Knife Usage"

San Diego, Apr 27, 2012 -- The SharpeningShack.com is now proud to offer our customers the ultimate sharpening service based upon "true edge-to-angle sharpness technology" for all your high-end cutlery, tactical and collector knives. This service is performed using the "Wicked Edge Precision Knife Sharpening System". This sharpening system guarantees all your knives will be hand sharpened by professionally skilled sharpeners that take your knife through as many as 13 different sharpening and honing process steps. During the process we will be using stones & hones from 60 to 100,000 grit depending on knife usage to achieve the perfect edge angle and sharpness.

We can sharpen all of your "straight edge knives", from your basics to best kitchen cutlery to a razors-edge sharpness. We sharpen American, Chinese, European and Japanese knives to the correct angle. You will wonder why you didn't take those knives in sooner to get sharpened.

The Wicked Edge sharpening service is excellent for re-profiling, repairing damaged blades or getting the "EXACT ANGLE" you want on that special knife or kitchen cutlery. When you select to have your knife done "Wicked Edge Sharp", the results are a perfectly sharpened knife edge at the original factory angle or your requested edge angle. Once your knife has been sharpened "Wicked-Edge" sharp, you'll now have a perfectly angled blade edge for future repeatable resharpening at home or with us.
